In AWS what is used for encrypting and decrypting login information to EC2 instances.

Q 1

A. Templates

B. AMI's

C. Key pairs

D. None of the above

Question 2

For DynamoDB, what are the scenario's in which you would want to enable Cross-region replication?

A. Live data migration

B. Easier Traffic management

C. Disaster Recovery

D. All of the above

Question 3

You have launched two web servers in private subnet and one ELB (internet facing) in public subnet in your VPC. Yet, you are still unable to access your web application through the internet, which of the following would likely the cause of this?

Choose two correct options

A. Web server must be launched inside public subnet and not private subnet.

B. Route table for public subnet is not configured to route to VPC internet gateway.

C. No elastic IP is assigned to web servers.

D. No internet gateway is attached to the VPC.

Question 4

Which of the following is mandatory when defining a cloudformation template?

A. Resources

B. Parameters

C. Outputs

D. Mappings

Question 5

In IAM, what is the representation of a person or service ?

A. User

B. Group

C. Team

D. Role

Question 6

Which of the below instances is used normally for massive parallel computations?

A. Spot Instances

B. On-Demand Instances

C. Dedicated Instances

D. This is not possible in AWS

Question 7

Which of the below are incremental backups of your EBS volumes? Choose one answer from the options given below.

A. Volumes

B. State Manager

C. Placement Groups

D. Snapshots

Question 8

There is a requirement to host a NoSQL database with a need for low latency. Which class of instances from the below list should they choose from ?

A. T2

B. I2

C. T1

D. G2

stance-type-available-now/

Question 9

You are designing a site for a new start up which generates cartoon images for people automatically. Customers will log on to the site, upload an image which is stored in S3. The application then passes a job to AWS SQS and a fleet of EC2 instances poll the queue to receive new processing jobs. These EC2 instances will then turn the picture in to a cartoon and will then need to store the processed job somewhere. Users will typically download the image once (immediately), and then never download the image again. What is the most commercially feasible method to store the processed images?

A. Rather than use S3, store the images inside a BLOB on RDS with Multi-AZ configured for redundancy.

B. Store the images on S3 RRS, and create a lifecycle policy to delete the image after 24 hours.

C. Store the images on glacier instead of S3.

D. Use elastic block storage volumes to store the images.

Question 10

You have a high performance compute application and you need to minimize network latency between EC2 instances as much as possible. What can you do to achieve this?

A. Use Elastic Load Balancing to load balance traffic between availability zones

B. Create a CloudFront distribution and to cache objects from an S3

bucket at Edge Locations.

C. Create a placement group within an Availability Zone and place the EC2 instances within that placement group.

D. Deploy your EC2 instances within the same region, but in different subnets and different availability zones so as to maximize redundancy.

Question 11

Which of the below elements can you manage in the Billing dashboard ? Select 2 options.

A. Budgets

B. Policies

C. Credential Report

D. Cost Explorer

Question 12

What is the name of the VPC that is automatically created for your AWS account for the first time ?

A. Primary VPC

B. First VPC

C. Default VPC

D. Initial VPC

Question 13

Which of the following databases support the read replica feature? Select 3 options.

A. MySQL

B. MariaDB

C. PostgreSQL

D. Oracle

Question 14

What can be used from AWS to import existing Virtual Machines Images into AWS?

A. VM Import/Export

B. AWS Import/Export

C. AWS Storage Gateway

D. This is not possible in AWS

Question 15

What is the service used by AWS to segregate control over the various AWS services ?

A. AWS RDS

B. AWS Integrity Management

C. AWS Identity and Access Management

D. Amazon EMR

Question 16

How long can messages live in a SQS queue ?

A. 12 hours

B. 10 days

C. 14 days

D. 1 year

Question 17

You working in the media industry and you have created a web application where users will be able to upload photos they create to your website. This web application must be able to call the S3 API in order to be able to function. Where should you store your API credentials whilst maintaining the maximum level of security?

A. Save the API credentials to your php files.

B. Don't save your API credentials. Instead create a role in IAM and assign this role to an EC2 instance when you first create it.

C. Save your API credentials in a public Github repository.

D. Pass API credentials to the instance using instance user-data.

Question 18

What are some of the common causes why you cannot connect to a DB instance on AWS ? Select 3 options.

A. There is a read replica being created, hence you cannot connect

B. The DB is still being created

C. The local firewall is stopping the communication traffic

D. The security groups for the DB are not properly configured.

Question 19

For which of the following databases does Amazon RDS provides high availability and failover support using Amazon's failover technology for DB instances using Multi-AZ deployments. Select 3 options.

A. SQL Server

B. MySQL

C. Oracle

D. MariaDB

Question 20

Which is the service provided by AWS for providing a petabyte-scale data warehouse ?

A. Amazon DynamoDB

B. Amazon Redshift

C. Amazon Kinesis

D. Amazon Simple Queue Service

Question 21

An image named photo.jpg has been uploaded to a bucket named examplebucket in the us-east-1 region. Which of the below is the right URL to access the image, if it were made public ?

Consider that S3 is used as a static website.

A. http://examplebucket.s3-website-us-east-1.amazonaws.com/photo.jpg

B. http://examplebucket.website-us-east-1.amazonaws.com/photo.jpg

C. http://examplebucket.s3-us-east-1.amazonaws.com/photo.jpg

D. http://examplebucket.amazonaws.s3-website-us-east-1./photo.jpg

Question 22

A company has an EC2 instance that is hosting a web solution which is mostly used for read-only purposes. The CPU utilization is constantly 100% on the EC2 instance. Which of the below solutions can help alleviate and provide a quick resolution to the problem.

A. Use Cloudfront and place the EC2 instance as the origin

B. Let the EC2 instance continue to run at 100%, since the AWS environment can handle the load.

C. Use SNS to notify the IT admin when it reaches 100% so that they can disconnect some sessions to help alleviate the load

D. Use SES to notify the IT admin when it reaches 100% so that they can disconnect some sessions to help alleviate the load

Question 23

Which of the mentioned AWS services uses the concept of shards and is uniquely identified group of data records in a stream?

A. Cloudfront

B. SQS

C. Kinesis

D. SES

Question 24

Which of the below mentioned services are the building blocks for creating a basic high availability architecture in AWS. Select 2 options.

A. EC2

B. SQS

C. Elastic Load Balancer

D. Cloudwatch

Question 25

You have a set of EC2 Instances launched via Autoscaling. You now want to change the Instance type for the instances that would be launched in the future via Autoscaling. What would you do in such a case

A. Change the Launch configuration to reflect the new instance type

B. Change the Autoscaling Group and add the new instance type.

C. Create a new Launch Configuration with the new instance type and replace the existing Launch configuration attached to the Autoscaling Group.

D. Create a new Launch Configuration with the new instance type and add it along with the existing Launch configuration attached to the Autoscaling Group.

Question 26

Which of the following services provides an object store which can also be used to store files ?

A. S3

B. SQS

C. SNS

D. EC2

Question 27

What are the different types of scale out options available in the AutoScaling service provided by AWS? Select 3 options.

A. Scheduled Scaling

B. Dynamic Scaling

C. Manual Scaling

D. Static Scaling

Question 28

Which of the following services provides edge locations that can be used to cache frequently accessed pages of a web application ?

A. SQS

B. Cloudfront

C. Subnets

D. EC2

Question 29

You are a security architect working for a large antivirus company. The production environment has recently been moved to AWS and is in a public subnet. You are able to view the production environment over HTTP however when your customers try to update their virus definition files over a custom port, that port is blocked. You log in to the console and you allow traffic in over the custom port. How long will this take to take effect?

A. Straight away but to the new instances only.

B. Immediately.

C. After a few minutes this should take effect.

D. Straight away to the new instances, but old instances must be

stopped and restarted before the new rules apply.

Question 30

You work for a company who are deploying a hybrid cloud approach. Their legacy servers will remain on premise within their own datacenter however they will need to be able to communicate to the AWS environment over a site to site VPN connection. What do you need to do to establish the VPN connection?

A. Connect to the environment using AWS Direct Connect.

B. Assign a static routable address to the customer gateway

C. Create a dedicated NAT and deploy this to the public subnet.

D. Update your route table to add a route for the NAT to 0.0.0.0/0.

Question 31

Which is the service provided by AWS for collecting and processing large streams of data in real time?

A. Amazon Kinesis

B. AWS Data Pipeline

C. Amazon AppStream

D. Amazon Simple Queue Service

Question 32

Which of the following criteria are some of which must be met when attaching an EC2 instance to an existing AutoScaling Group ? Select 3 options.

A. The instance is in the running state.

B. The AMI used to launch the instance must still exist.

C. The instance is not a member of another Auto Scaling group.

D. They should have the same private key

Question 33

A company wants to make use of serverless code. Which service in AWS provides such a facility?

A. SQS

B. Cloudfront

C. EC2

D. Lambda

Question 34

A t2.medium EC2 instance type must be launched with what type of Amazon Machine Image (AMI)?

A. An Instance store Hardware Virtual Machine AMI

B. An Instance store Paravirtual AMI

C. An Amazon EBS-backed Hardware Virtual Machine AMI

D. An Amazon EBS-backed Paravirtual AMI

Question 35

You are building an automated transcription service in which Amazon EC2 worker instances process an uploaded audio file and generate a text file. You must store both of these files in the same durable storage until the text file is retrieved. You do not know what the storage capacity requirements are. Which storage option is both cost-efficient and scalable?

A. Multiple Amazon EBS volume with snapshots

B. A single Amazon Glacier vault

C. A single Amazon S3 bucket

D. Multiple instance stores

Question 36

You have some EC2 instances hosted in your AWS environment. You have a concern that not all of the EC2 instances are being utilized. Which of the below mentioned services can help you find underutilized resources in AWS ? Select 2 options.

A. AWS Cloudwatch

B. SNS

C. AWS Trusted Advisor

D. Cloudtrail

Question 37

Which of the following features can be used to capture information for outgoing and incoming IP traffic from network interfaces in a VPC.

A. AWS Cloudwatch

B. AWS EC2

C. AWS SQS

D. AWS VPC Flow Logs

Question 38

What are the main benefits of AWS regions? Select 2 options.

A. Regions allow you to design applications to conform to specific laws and regulations for specific parts of the world.

B. All regions offer the same service at the same prices.

C. Regions allow you to choose a location in any country in the world.

D. Regions allow you to place AWS resources in the area of the world closest to your customers who access those resources.

Question 39

Which of the following are ways that users can interface with AWS? Select 2 options.

A. AWS Cloudfront

B. AWS CLI

C. AWS Console

D. AWS Cloudwatch

Question 40

What are the two layers of security provided by AWS in the VPC?

A. Security Groups and NACLs

B. NACLs and DHCP Options

C. Route Tables and Internet gateway

D. None of the above

Question 41

A company wants to have a 50 Mbps dedicated connection to its AWS resources. Which of the below services can help fulfil this requirement ?

A. Virtual Private Gateway

B. Virtual Private Connection (VPN)

C. Direct Connect

D. Internet Gateway

Question 42

What is the service name in AWS that can display costs in a chart format?

A. Cost Explorer

B. Cost Allocation Tags

C. AWS Budgets

D. Payment History

Question 43

In the shared responsibility model, what is the customer not responsible for?

A. Edge locations

B. Installation of custom firewall software

C. Security Groups

D. Applying an SSL Certificate to an ELB

Question 44

Which of the below options best describes how EBS snapshots work?

A. Each snapshot stores the entire volume in S3

B. Snapshots are not possible for EBS volumes

C. Snapshots are incremental in nature and are stored in S3

D. Snapshots are stored in DynamoDB

Question 45

You work for a market analysis firm who are designing a new environment. They will ingest large amounts of market data via Kinesis and then analyze this data using Elastic Map Reduce. The data is then imported in to a high performance NoSQL Cassandra database which will run on EC2 and then be accessed by traders from around the world. The database volume itself will sit on 2 EBS volumes that will be grouped into a RAID 0 volume. They are expecting very high demand during peak times, with an IOPS performance level of approximately 15,000. Which EBS volume should you recommend?

A. Magnetic

B. General Purpose SSD

C. Provisioned IOPS (PIOPS)

D. Turbo IOPS (TIOPS)

Question 46

Which of the following best describes the main feature of an Elastic Load Balancer (ELB) in AWS?

A. To evenly distribute traffic among multiple EC2 instances in separate Availability Zones.

B. To evenly distribute traffic among multiple EC2 instances in a single Availability Zones.

C. To evenly distribute traffic among multiple EC2 instances in a multiple regions.

D. To evenly distribute traffic among multiple EC2 instances in a multiple counties.

Question 47

What are the 2 main components of AutoScaling? Select 2 options.

A. Launch Configuration

B. Cloudtrail

C. Cloudwatch

D. AutoScaling Groups

Question 48

What are two primary requirements of a NAT Instance? Choose the correct answer from the options below:

A. A NAT instance must be provisioned into a private subnet, and it must part of the private subnet's route table.

B. A NAT instance must be provisioned into a public subnet, and it must part of the private subnet's route table.

C. A NAT instance must be provisioned into a private subnet, and does not require a public IP address.

D. A NAT instance must be provisioned into a public subnet, and must be combined with a bastion host.

Question 49

You have just provisioned a fleet of EC2 instances and realized that none of them have a public IP address. What settings would need to be changed for the next fleet of instances to be created with public IP addresses?

A. Modify the auto-assign public IP setting on the subnet.

B. Modify the auto-assign public IP setting on the instance type.

C. Modify the auto-assign public IP setting on the route table.

D. Modify the auto-assign public IP setting on the VPC.

Question 50

You keep on getting an error while trying to attach an Internet Gateway to a VPC. What is the most likely cause of the error?

A. You need to have a customer gateway defined first before attaching an internet gateway

B. You need to have a public subnet defined first before attaching an internet gateway

C. You need to have a private subnet defined first before attaching an internet gateway

D. An Internet gateway is already attached to the VPC

Question 51

Which of the following feature can be used to move Objects from S3 standard storage to Amazon Glacier

A. S3 Events

B. Object Versioning

C. Storage Class

D. Lifecycle policies

Question 52

You work for a company that stores records for a minimum of 10 years. Most of these records will never be accessed but must be made available upon request (within a few hours).

What is the most cost-effective storage option?

A. S3-IA

B. Reduced Redundancy Storage (RRS)

C. Glacier

D. AWS Import/Export

Question 53

What are the services from AWS helps to migrate databases to AWS easily ?

A. AWS Snowball

B. AWS Direct Connect

C. AWS Database Migration Service (DMS)

D. None of the above

Question 54

Your company has petabytes of data that it wants to move from their on-premise location to AWS. Which of the following can be used to fulfil this requirement?

A. AWS VPN

B. AWS Migration

C. AWS VPC

D. AWS Snowball

Question 55

There are multiple issues reported from an EC2 instance hence it is required to analyze the logs files. What can be used in AWS to store and analyze the log files?

A. SQS

B. S3

C. Cloudtrail

D. Cloudwatch Logs

Question 56

You are not able to connect to an EC2 instance via SSH, and you have already verified that the instance has a public IP and the Internet gateway and route tables are in place, what should you check next?

A. Adjust the security group to allow traffic to port 22

B. Adjust the security group to allow traffic to port 3389

C. Restart the instance since there might be some issue with the instance

D. Create a new instance since there might be some issue with the instance

Question 57

Your company VPC has a need to communicate with another company VPC within the same AWS region. What can be used from AWS to interface between the two VPC?

A. VPC Connection

B. VPN Connection

C. Direct Connect

D. VPC Peering

Question 58

You currently have an EC2 instance hosting a web application. The number of users is expected to increase in the coming months and hence you need to add more elasticity to your setup. Which of the following methods can help add elasticity to your existing setup. Choose 2 answers from the options given below

A. Setup your web app on more EC2 instances and set them behind an Elastic Load balancer

B. Setup an Elastic Cache in front of the EC2 instance.

C. Setup your web app on more EC2 instances and use Route53 to route requests accordingly.

D. Setup DynamoDB behind your EC2 Instances

Question 59

You are creating a Provisioned IOPS volume in AWS. The size of the volume is 8 GiB. Which of the following are the possible values that can put for the IOPS of the volume

A. 400

B. 500

C. 600

D. 1000

A company is hosting EC2 instances which focuses on work-loads are on non-production and non-priority batch loads. Also these processes can be interrupted at any time. What is the best pricing model which can be used for EC2 instances in this case?

A. Reserved Instances

B. On-Demand Instances

C. Spot Instances

D. Regular Instances

Question 61

You have 2 Ubuntu instances located in different subnets in the same VPC. Now to your understanding these instances should be able to communicate with each other, but when you try to ping from one instance to another, you get a timeout. The Route tables seem to be valid and has the entry for the Target 'local' for your VPC CIDR. Which of the following could be a valid reason for this issue.

A. The Instances are of the wrong AMI , hence you are not able to ping the instances.

B. The Security Group has not been modified for allow the required traffic.

C. The Instances don't have Public IP, so that the ping commands can be routed

D. The Instances don't have Elastic IP, so that the ping commands can be routed

Question 62

What is the best way to move an EBS volume currently attached to an EC2 instance from one availability zone to another ?

A. Detach the volume and attach to an EC2 instance in another AZ.

B. Create a new volume in the other AZ and specify the current volume as the source.

C. Create a snapshot of the volume and then create a volume from the snapshot in the other AZ

D. Create a new volume in the AZ and do a disk copy of contents from one volume to another.

Question 63

When it comes to API credentials, what is the best practise recommended by AWS?

A. Create a role which has the necessary and can be assumed by the EC2 instance.

B. Use the API credentials from an EC2 instance.

C. Use the API credentials from a bastion host.

D. Use the API credentials from a NAT Instance.

Question 64

You want to retrieve the Public IP addresses assigned to a running instance via the Instance metadata. Which of the below urls is valid for retrieving this data.

A. http://169.254.169.254/latest/meta-data/public-ipv4

B. http://254.169.254.169/latest/meta-data/public-ipv4

C. http://254.169.254.169/meta-data/latest/public-ipv4

D. http://169.254.169.254/meta-data/latest/public-ipv4

Question 65

You are planning to use the MySQL RDS in AWS. You have a requirement to ensure that you are available to recover from a database crash. Which of the below is not a recommended practise when you want to fulfil this requirement

A. Ensure that automated backups are enabled for the RDS

B. Ensure that you use the MyISAM storage engine for MySQL

C. Ensure that the database does not grow too large

D. Ensure that file sizes for the RDS is well under 16 TB.
