SAHANA S H

AI/ML Computational Analyst | Senior Databricks & Data Engineer

✉ shsahana1998@gmail.com | ✆ +91-8867328072 | Bangalore, India

Address: Bangalore – 560098, Karnataka, India
Phone: +91-8867328072
Email: shsahana1998@gmail.com
Experience: 7 Years 1 Month
Location: Bangalore, India

SUMMARY

Results-driven AI/ML Computational Analyst and Senior Databricks/Data Engineer with 6 years 9 months of experience at Accenture, including 3 years 9 months on the Merck Pharmaceutical Data Sciences (PDS) program. Expertise in end-to-end data pipeline engineering on Databricks — data source onboarding (Oracle, SQL Server, Trino, REST APIs, Veeva Vault, envision), modular loader frameworks, PySpark and Apache Spark scripting for large-scale data transformation, Python-based file ingestion (XML/JSON/ZIP), and CI/CD via GitHub Actions and Apache Airflow. Databricks Certified Data Engineer Associate. AWS Developer Associate certified.

SKILLS&COMPETENCIES

- Databricks / Delta Lake
- PySpark / Apache Spark SQL
- Python (primary language)
- SQL / YAML / XML / Java
- AWS (EC2, S3, Lambda, IAM…)
- REST API Integration
- ETL/ELT Pipeline Design
- Apache Airflow (DAGs)
- GitHub Actions / CI-CD
- Oracle / MS SQL Server / Trino
- AWS CodePipeline / CodeBuild
- Informatica PowerCenter
- GitHub Copilot / GPTeal
- Postman / TOAD / SQL Developer
- UNIX Shell Scripting
- VS Code / Git / Jenkins

ACHIEVEMENTS

- Databricks Certified Data Engineer **Professional** | **Associate** | PySpark Developer Certified
- AWS Developer Associate Certified | AWS Solutions Architect Associate Certified
- Business Appreciation Award (FY26) — end-to-end pipeline delivery at Merck PDS
- Business Appreciation Award (FY26) — Veeva Vault migration to direct API approach
- Client Appreciation — received for all successful deliverables
- Employee of the Month — Accenture Technologies, Bangalore
- GenAI Impact: Saved 115 hrs (baseline 273 hrs) via GitHub Copilot & GPTeal across 70 JIRA tickets

EDUCATION

RNSIT, VTU University, Karnataka — 2019
Bachelor of Engineering — Information Science & Engineering

CERTIFICATIONS/TRAINING

- Databricks Certified Data Engineer Associate (FY26)
- PySpark Developer — Self-Paced Training + PySpark Badge
- AWS Developer Associate Certified
- AWS Solutions Architect Associate — Chroma Campus, Noida
- Azure Databricks — Upskilling completed
- GenAI Trainings — GitHub Copilot, GPTeal; Accenture GenAI Program

PERSONALDETAILS

Nationality: Indian
Languages: English, Hindi, Kannada
Location: Bangalore – 560098, Karnataka, India

SAHANA S H

AI/ML Computational Analyst | Senior Databricks & Data Engineer

PROFESSIONAL EXPERIENCE

SENIOR DATA ENGINEER | AI/ML COMPUTATIONAL ANALYST

Accenture Technologies — Merck Pharmaceutical PDS | Jan 2023 – Present

- Designed and delivered end-to-end modular data pipelines on Databricks across 12 major tasks with zero escalations
- Built Stage, Pub, and Archive loader framework using XML (JDBC driver config) and YAML dataset definitions; connected to Oracle, SQL Server, Trino, and REST APIs; stored data in Databricks Volumes (AWS S3)
- Authored PySpark and Apache Spark scripts for large-scale data transformation, aggregation, and cleansing across multiple datasources within the Databricks environment
- Led Veeva Vault MIIG migration to direct API approach: built 3 Python loader scripts for 170+ objects, eliminating intermediate steps
- Built iEnvision pipeline: Python scripts convert API responses (XML → CSV) and trigger parent workflows to load data
- Built VeevaLink and key-people pipelines: pulled JSON/ZIP files, converted 1,000+ JSON files to CSV, and loaded to Databricks
- Integrated multiple REST APIs (GET/POST) using Postman; orchestrated workflows with Apache Airflow DAGs
- Built CI/CD pipelines via GitHub Actions; maintained metadata tables for dynamic pipeline logic
- Saved 115 hrs (baseline 273 hrs) via GitHub Copilot and GPTeal across 12 JIRA tickets
- Delivered KT sessions on 10 major data sources; served as POC for GenAI/GenWizard coordination

AWS DEVELOPER

Accenture Technologies — Burbank | June 2021 – Dec 2022

- Designed and managed AWS cloud infrastructure (EC2, S3, VPC, IAM, Lambda, CloudWatch, CloudFormation, ECS) for a SaaS BPM platform
- Built site-to-site VPN between on-premises Data Center and AWS VPC; managed S3 bucket policies and cross-account access
- Built CI/CD pipelines via AWS CodePipeline deploying Docker containers to ECS (CodeBuild, CodeDeploy, CloudFormation)
- Configured IAM roles, policies, and MFA for fine-grained access control; set up CloudWatch alarms with automated remediation
- Scripted cross-account S3 object copying using AWS CLI and Python-boto3

SOFTWARE ENGINEER — ILS DATA MIGRATION

Accenture Technologies — Burbank | Jan 2020 – May 2021

- Extracted, transformed, and loaded data from MetricStream Stage 1 into Oracle Stage 2 using Informatica PowerCenter
- Developed Python scripts to convert BLOB data into documents and upload to AWS S3; managed NAS and BLOB S3 folder structures
- Created IAM roles and S3 bucket policies for cross-account access between MetricStream and Disney AWS environments

SOFTWARE ENGINEER — C3 REPORTING & DATA MANAGEMENT

Accenture Technologies — USA Client | Oct 2019 – Dec 2019

- Maintained Informatica ETL jobs loading credit/debit data from Chase Bank FTP and Globalscape servers into Oracle C3 database
- Generated BO reports from C3 tables and published to RDES; performed column-level data mapping and post-load verification

PROJECT HIGHLIGHTS

- Merck PDS BI Engineering Platform — Databricks, AWS S3, Apache Airflow, GitHub Actions; sources: Oracle, MS SQL Server, Trino
- Veeva Vault Direct API Migration — eliminated legacy intermediate steps; 170+ objects onboarded
- AWS DevOps / Cloud Data Platform (Burbank) — SaaS BPM on AWS with full CI/CD and VPN setup
- ILS Data Migration (Burbank) — Informatica-powered ETL with BLOB-to-S3 Python automation
- C3 Credit-Card Reporting — Informatica ETL maintenance and BO report generation for Chase Bank data
